CURIOS FACES—THE BLOODY SWEAT.

An eminent English physician, Dr. Stoeck, has written a book on "The Disease of the Death of Christ." He discusses "The Bloody Sweat," or "Piercing of the Heart," and shows that the disease, which he believes to be the cause of death, was not the work of Satan, but of God. The author also discusses the various historical illustrations on the subject, and gives a full account of the religious belief in the sweat of the corporal effects of illness, disease, and death. In which it actually occurs.

Winter Arrangement.
